Welcome to Vitanaland: your community onboarding questionnaire

Thank you for joining Vitanaland. To set up your own community space (a tailored clone of the Maxina app) we need a few details about **how your community looks** (branding) and **who runs it legally** (legal). Please fill in the answers below and send this document back to the Exafy team, along with your image files.

You do not need any technical knowledge. Every question has a plain-language prompt, the format we need, and a real example from an existing community (Maxina or Alkalma) so you can see what a good answer looks like. If a question does not apply to you, just write "n/a" and we will help.

The Exafy team then transcribes your answers into the provisioning pack and runs the manual setup. You do not send this anywhere else, and you do not set anything up yourself: we do that for you.

How to fill this in

- Replace each `Your answer:` line with your answer.
- Keep to the format shown. Where we say "hex colour" or "≤ 200 characters", that limit matters: it is checked during setup.
- For images, attach the files to the same message; do not paste them inline.

Part A: Branding

This is everything that makes the community look and sound like yours: the name, colours, logo, the address members write to for help, and the facts your assistant should know about you.

A1. Community short name (slug)

The short, lowercase handle for your community. It becomes part of your web address and cannot be changed later, so choose carefully.

- **Format:** 3 to 32 characters, lowercase letters, numbers and single hyphens only (for example `green-circle`, not `Green Circle` or `green--circle`). It must not be a reserved word; the Exafy team will confirm your choice is free.
- **Example:** `maxina` · `alkalma`

Your answer:

A2. Community display name

The name shown to members in the app. This one can use capital letters and spaces exactly as you want it to appear.

- **Format:** short text, up to 80 characters.
- **Example:** `Maxina` · `AlKalma`

Your answer:

A3. Brand colours

Three colours that theme your app. Please give each as a 6-digit hex code in the form `#RRGGBB` (for example `#FF7BAC`). If you are not sure of the exact codes, send us your logo and a short description and we will propose a set for you to approve.

- **Accent:** your main highlight colour (buttons, links).
  - **Format:** hex colour `#RRGGBB`.
  - **Example:** `#FF7BAC` (Maxina) · `#3B82F6` (Alkalma)

  Your answer:
- **Background:** the app's base background colour.
  - **Format:** hex colour `#RRGGBB`.
  - **Example:** `#FFF5F8` (Maxina) · `#EFF6FF` (Alkalma)

  Your answer:
- **Foreground:** the main text colour.
  - **Format:** hex colour `#RRGGBB`.
  - **Example:** `#1A1A1A` (both Maxina and Alkalma)

  Your answer:

A4. Support email address

The address members can write to for help. This is shown inside the app.

- **Format:** a working email address.
- **Example:** `support@vitanaland.com` (Maxina)

Your answer:

A5. Email sender name

The name that appears as the "from" name on emails your community sends (for example welcome messages).

- **Format:** short text, usually " by VITANA".
- **Example:** `Maxina by VITANA`

Your answer:

A6. Email sender address

The "from" address on emails your community sends. It must be on a sending domain we have verified for you. If you do not have one yet, leave this blank and the Exafy team will set up and verify a domain with you.

- **Format:** a working email address on a verified sending domain.
- **Example:** `noreply@vitanaland.com` (Maxina)

Your answer:

A7. How members first join

How do you want new people to be able to join when you launch?

- **Format:** choose exactly one of: `invite_only` (people can only join with an invitation), `signup` (anyone can sign up), `waitlist` (people request access and you let them in).
- **Example:** `invite_only` (the usual starting choice)

Your answer:

A8. Persona facts: what your assistant should know about you

Your community has an AI assistant. To sound like it belongs to you, it needs a few **facts** about your community.

> **Important: give facts, not sentences.** Write short true facts, never sentences the assistant should say out loud.
>
> - Good (a fact): `Founded 2026 in Vienna`
> - Not allowed (a spoken line): `Welcome to our lovely community!`
>
> The assistant writes its own wording from your facts. Each fact must be 200 characters or fewer, and each list below can hold up to 8 facts.

- **Community name:** what your community is called in conversation.
  - **Example:** `Maxina` · `Alkalma`

  Your answer:
- **Community name pronunciation** (optional): how to say the name out loud.
  - **Example:** `mah-KSEE-nah` (Maxina)

  Your answer:
- **Anchor person** (optional): a key person the community is built around.
  - **Name:** Your answer:
  - **Pronunciation of their name:** Your answer:
  - **Their role** (for example "founder", "head coach"): Your answer:
- **Story facts** (up to 8): true facts about your community's history or purpose. Each a fact, 200 characters.

    - **Example:** `Founded 2026 in Vienna`

  Your answers: 1. 2. 3.

- **Offer facts** (up to 8): true facts about what your community offers members (programmes, services, events). Each a fact, 200 characters.

  Your answers:

  1.
  2.
  3.

- **Tone** (up to 8): adjectives describing how your community feels (not full sentences).
    - **Example:** `warm` , `practical` , `encouraging`

  Your answers: 1. 2. 3.

A9. Brand image files

Please attach the following image files to your message. Each must be a **PNG, JPG, JPEG or WEBP** file, **1 MB or smaller**. We cannot accept SVG or GIF files.

- **Logo:** your community logo. *(required)*
- **Favicon:** the small icon shown in the browser tab. *(required)*
- **OG image:** the preview image shown when a link to your community is shared on social media or messaging apps. *(optional)*

Files attached: (list the file names you are sending)

Part B: Legal

This is the formal legal side: the registered entity that stands behind your community.

B1. Legal entity line

The registered legal entity responsible for your community, as it should appear in legal and footer text (for example your company's registered name).

- **Format:** short text, up to 200 characters.
- **Example:** `Exafy LTD` (used by both Maxina and Alkalma)

Your answer:

What happens next

Once you send this back:

1. The Exafy team reviews your answers (including a quick check that the persona facts are facts, not spoken lines).
2. We transcribe your answers into the provisioning pack and run the manual setup described in our internal runbook (`docs/validation/VTID-05150/RUNBOOK-provision.md`).
3. We set up your branding, your assistant and your community space, then confirm with you when it is ready.

A few fields are **set by the Exafy team, not by you**: things like the admin email, AI budget, enabled languages, timezone and currency. We will confirm those with you directly during setup, so you do not need to provide them here.

Thank you. We are looking forward to welcoming your community to Vitanaland.
